

Process Control Expertise

Configurable CIP
(Clean-in-Place)

Batch Control &
Recipe Management

Pasteurization
(HTST)

Materials Intake
& Storage

Drying &
Evaporation

Resource Optimization:
Water, Chemicals, Energy

24/7 Service & Support

Support Department

- Dedicated support team of engineers
- Automation controls, server, and network support
- Remote support by phone and email
- VPN connectivity for remote support and on-site services

Support Contracts

- Managed service provider (MSP) for server and software systems
- Periodic system health reports
- Continuous, live monitoring of server and network infrastructure
- Patches and security updates

Partners & Certifications

Cybertrol continues to achieve and maintain certifications and partnerships with industry-leading products and organizations.

The grid contains the following logos:

- RA GOLD System Integrator (A ROCKWELL AUTOMATION PARTNER)
- csia CERTIFIED
- PLEX by ROCKWELL AUTOMATION
- SIEMENS Solution Partner (Automation)
- Ignition Gold Certified Integrator
- AVEVA CERTIFIED OPERATIONS System Integrator
- CISCO Partner (Premier Integrator)
- vmware PARTNER (PROFESSIONAL SOLUTION PROVIDER)
- veeam PROPARTNER
- PANDUIT ONE PARTNER PROGRAM
- THINMANAGER A ROCKWELL AUTOMATION TECHNOLOGIST
- Stratus Certified Solution Architect
- ecse CERTIFIED
- Microsoft
- SymphonyAI INDUSTRIAL

CYBERTROL
ENGINEERING

PLANTWIDE
AUTOMATION & INFORMATION
SOLUTIONS

Plantwide Automation

Transform your facility into a smart factory.

Cybertrol specializes in designing, implementing, and maintaining plantwide control and information systems that optimize efficiency, enhance productivity, and ensure the seamless operation of industrial processes. Our engineers are experts at selecting and integrating the appropriate hardware and software components to create a cohesive and reliable control system that follows industry-best practices.

- Project Management
- Control System Design
- PLC/HMI/SCADA Programming
- Assessments & Modernization
- Electrical Design/CAD Drawing
- UL 508A/UL 698A Control Panels
- Software Engineering
- Documentation Development
- Advanced Process Control
- Automation Functional Safety
- Factory Acceptance Testing (FAT)
- Packaging Line Integration

Manufacturing Intelligence

Data acquisition & custom reporting allows for comprehensive operational analysis.

Cybertrol's manufacturing intelligence solutions utilize our team's information systems and manufacturing expertise to help you effectively view and analyze your operations. We provide plantwide information systems at each site, aggregate data for enterprise dashboards, and apply manufacturing intelligence strategies that leverage tools and interfaces designed to help you streamline your processes.

From historian systems and data collection to mobile solutions and custom reports, we're here to provide 24/7 support for your goals via a partnership approach.

Industrial IT/OT Solutions

Seamless integration between manufacturing processes & IT infrastructure is critical.

Cybertrol's industrial IT team offers solutions to bridge the gap between information technology (IT) and operational technology (OT) to create a seamless and secure infrastructure for industrial operations. Based on our in-depth knowledge of industrial network best practices, security, and industry standards and protocols, Cybertrol is well positioned to work with your IT department to build the smart network today, that you'll need for tomorrow.

Trust our team to help with:

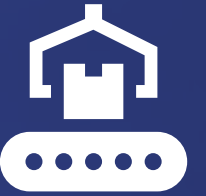

Industrial Data Centers (IDCs) – leverage turnkey data center solutions for the highest level of availability and redundancy to eliminate potentially catastrophic downtime.

Networks – transform any facility into a cutting-edge space with comprehensive network services including site assessments, mapping, upgrade planning, design, and much more.

Cybersecurity – prevent unauthorized network access and ensure long-term success with our role-based security solutions.

Managed Services – keep operations up and running with services such as monthly reports on system health, proactive remote monitoring and management, automated system backups, and 24/7 comprehensive support.

Manufacturing Execution System (MES) Solutions

Optimize production efficiency & visibility with advanced MES solutions.

Unlock the full potential of your production line with state-of-the-art manufacturing execution system (MES) solutions from Cybertrol Engineering. As a leading control system integrator, we offer MES solutions that seamlessly bridge the gap between plant floor operations and business systems, ensuring real-time data visibility, optimized performance, and enhanced productivity.

Our expert team is ready to guide you through every step of MES implementation, ensuring seamless integration, maximum efficiency, and optimal results for your organization. With our extensive industry experience and knowledge-driven solutions, we are committed to helping you stay ahead in the ever-evolving manufacturing landscape.
