# BatchWorks

Cybertrol Engineering's BatchWorks is a web-based, MES software that seamlessly transacts material consumption and production information with your ERP system, enabling real-time visibility to production cost, inventory availability, batch cycle time, and batch quality.

Functionality:

- **Integrates with Server-based or PLC-based batching engines**

- **Formulation management – consolidates recipes**
  - 1,000's:1 ratio

- **Production scheduling, including campaigns**
  - Directly from BatchWorks interface
  - Imported from MES/ERP

- **ERP integration for inventory transactions**

BatchWorks Reporting:

- **Comprehensive batch reporting**

- **Includes batch trend data**

- **Customizable**
