

Global System Integrator Program Plex MES Capability Overview

Program Tiers

Bronze requirements
One credentialed resource for one capability

Silver requirements
Two credentialed resources for minimum of two capabilities

Gold requirements
Three credentialed resources for minimum of three capabilities

Platinum requirements
Four credentialed resources for minimum of four capabilities

The Plex MES Capability is intended to promote a System Integrators' expertise in delivering state of the art information solutions to industrial clients. The Plex MES Capability is appropriate for existing as well as new OT partners who have an interest in expanding their value through delivery of information solutions that solve customers' business needs.

The Plex Learning Plan is available and posted to the System Integrator learning plan on the [Plex Education Portal \(PEP\)](#). Please review the [Plex Success Kit](#) for information on the Capability and how to access PEP.

After the Plex Training has been completed, the SI should engage our Partner Technical Enablement Consultant team for opportunity and implementation coaching.

Requirements to receive capability

1. **Complete on-demand MES Capability Learning Plan OR In-Person MES Implementer Bootcamp**
2. **Pass the [Plex MES Assessment](#) with a score of 80% or higher**
3. **Successfully Implement 1 Plex MES Project and complete First Project Review**
4. **Work with Rockwell to publish 1 success story/case study**
